

Capsule Device Driver Interface Library

TECHNICAL DATA SHEET

Capsule's Medical Device Information System includes built-in support for hundreds of diverse medical devices from every major manufacturer. New SmartLinx Device Driver Interfaces (DDIs) are continuously added to support new versions, models and manufacturers.

To request new DDI development, contact capsule.sales@qualcommllife.com.

Check the Capsule web site capsuletech.com for the most up-to-date list of supported devices.

Capsule is providing you this exhaustive list of medical device drivers available. Nevertheless, individual drivers may not work with a specific system environment. Integration, functionality and usability of any individual driver is specific to the version of Capsule solution and the receiving systems (EMR, Alarm Management, Asset Management, etc.). Make sure to contact your Capsule sales representative to define the appropriate solution that will fit with your environment.
